Jonathan does customer development with university customers and has worked closely with Rutgers on recent on-campus collaborations. He will do a company overview to familiarize everyone with Thorlabs.

Eric will give an overview of Thorlabs brand new Quantum Optics kit. Thorlabs' Discovery line of educational products aims to promote physics, optics, and photonics. Covering topics from classic physics experiments to emerging fields of research, the kits can be used in college lab courses or as demonstrations during a lecture.

Will is a former Rutgers-Newark student and he will tell the story of his career thus far as well as about his work at Thorlabs. He hopes that his story illuminates some new possible career paths that Rutgers-Newark students may not have considered.
