

Ph.D. Thesis Advisor Choice Form

Listed below are the faculty of the Rutgers Ph.D. Program in Chemistry. To assure that you have sufficient knowledge of the various research directions that are pursued in our department, brief faculty presentations will be scheduled during the month of September. You then must consult at least three (3) faculty members to discuss research projects in more detail. Those you consult should sign this form.

Once you have discussed research with at least 3 professors, please indicate your preferred research advisor (1st, 2nd, 3rd choice). At that point please return this form to the graduate advisor. For students entering during Fall terms, you should select an advisor before Thanksgiving; for students entering during Spring terms, your decision should be made before the spring break in March.

Prof. Brenner-Moyer _____

Prof. Galoppini _____

Prof. He _____
